TECHNICAL SKILLS

Proficient: Javascript, HTML, CSS, React, Node.js, Express.js, SQL, Git

Knowledgeable: Python, TypeScript, Angular, Next.js, Tailwind CSS, Figma, Supabase, Supabase Realtime

Additional: Adobe Photoshop, Adobe Illustrator, Restore365, MICA, Autodesk 3ds Max, Microsoft Suite

TECHNICAL PROJECTS

Shonen Throwdown | Full-stack Developer | <https://github.com/Peppermint-Patties/Shonen-Throwdown.git> **March 2023 – April 2023**

Developed an Online Multiplayer Trading Card Game leveraging Next.js, Supabase, Supabase Realtime, and Framer Motion. The project encompassed comprehensive user interactions, secure authentication, a dynamic market system, real-time state updates, and seamless real-time messaging capabilities—both for general communication and channel-specific interactions—enriching the overall gameplay experience.

Grace Shopper (E-Commerce) | Full-stack Developer | https://github.com/msPiggyFSA/grace_Shopper.git **February 2023**

Designed and developed a sophisticated E-Commerce platform, powered by technologies such as React, Redux, PostgreSQL, and Express.js. This project included the implementation of user account management, personalized user profiles, and seamless user interactions. Security was ensured through the integration of JWT authentication. The platform offers robust cart management and a seamless check-out experience, facilitated by Stripe payment processing.

WORK EXPERIENCE
